#### Endangered Species Protection Worksheet: Criterion C3

The following questions will help you determine your eligibility under Part 1.1.4 of the permit with respect to protection of Endangered Species Act (ESA) species and critical habitat(s). Please refer to Appendix E ([https://www.epa.gov/sites/production/files/2021-01/documents/2021\\_msgp\\_-\\_appendix\\_e\\_-\\_procedures\\_relatng\\_to\\_endangered\\_species\\_protection.pdf](https://www.epa.gov/sites/production/files/2021-01/documents/2021_msgp_-_appendix_e_-_procedures_relatng_to_endangered_species_protection.pdf)) of the 2021 MSGP for important information regarding your obligations under this permit concerning ESA-protected species and critical habitat(s).

### Determine ESA Eligibility Criterion

Are your industrial activities already addressed in another operator's valid certification of eligibility for your "action area" under eligibility criteria A, C, D, or E of the 2021 MSGP? **No**

Are your industrial activities the subject of a permit under section 10 of the ESA by the USFWS and/or NMFS, and this authorization addresses the effects of your facility's discharges and discharge-related activities on ESA-listed species and critical habitat?

**No**

You must determine whether species listed as either threatened or endangered under the Endangered Species Act, and/or their critical habitat are located in your facility's action area. ESA-listed species and critical habitat are under the purview of the NMFS and the USFWS.

### Determine Your Action Area

Your "action area" (as defined in Appendix A ([https://www.epa.gov/sites/production/files/2021-01/documents/2021\\_msgp\\_-\\_appendix\\_a\\_-\\_definitions.pdf](https://www.epa.gov/sites/production/files/2021-01/documents/2021_msgp_-_appendix_a_-_definitions.pdf))) includes all areas to be affected directly or indirectly by the action and not merely the immediate area involved in the action, including areas beyond the footprint of the facility that are likely to be affected by stormwater discharges, discharge-related activities, and authorized non-stormwater discharges. You must select and confirm that all the following are true:

- In determining my "action area", I have considered that discharges of pollutants into downstream areas can expand the action area well beyond the footprint of my facility and the discharge point(s). I have taken into account the controls I will be implementing to minimize pollutants and the receiving waterbody characteristics (e.g. perennial, intermittent, ephemeral) in determining the extent of physical, chemical, and/or biotic effects of the discharges. I confirm that all receiving waterbodies that could receive pollutants from my facility are included in my action area.

**True**

- In determining my "action area", I have considered that discharge-related activities must also be accounted for in determining my action area. I understand that discharge-related activities are any activities that cause, contribute to, or result in stormwater and authorized non-stormwater point source discharges, and measures such as the siting, construction, and operation of stormwater controls to control, reduce, or prevent pollutants from being discharged. I understand that any new or modified stormwater controls that will have noise or other similar effects, and any disturbances associated with construction of controls, are part of my action area.

**True**

Provide a written description of your action area and explain your rationale for the extent of the action area drawn on your map. Click here for an example.

The action area for stormwater discharges from the Easthampton Wastewater Treatment Plant (WWTP) includes the entire property and extends beyond the property boundaries into the Manhan River. The facility has two storm water outfalls that discharge through concrete headwalls to southern bank the Manhan River. The action area includes the area of the discharge and ¼ mile downstream.

Attach a map of the action area for your facility. Mapping tool IPaC (the Information, Planning, and Consultation System) located at <http://ecos.fws.gov/ipac/> (<https://ecos.fws.gov/ipac/>) or click here ([https://www.epa.gov/sites/production/files/2021-01/documents/action\\_area\\_example.pdf](https://www.epa.gov/sites/production/files/2021-01/documents/action_area_example.pdf)) for an example.

### Determine if ESA-listed species and/or critical habitat are in your facility's action area.

ESA-listed species and critical habitat are under the purview of the NMFS and the USFWS, and in many cases, you will need to acquire species and critical habitat lists from both federal agencies.

### National Marine Fisheries Service (NMFS)

## U.S. Fish and Wildlife Service (USFWS)

To obtain FWS-listed species and critical habitat information, use the resources listed below:

- IPaC (the Information, Planning, and Consultation System) (<https://ecos.fws.gov/ipac/>)
- For instructions for using IPaC, click here.

I have checked the webpages listed above and confirmed that: There are FWS-listed species and/or critical habitat in my action area.

For FWS species, include the full printout from your IPaC query/Official Species List.

You may be eligible under **Criterion C**. You must assess whether your discharges and discharge-related activities are likely to adversely affect ESA-listed species or critical habitat, and whether any additional measures are necessary to ensure no likely adverse effects. In order to make a determination of your facility's likelihood of adverse effects, you must complete the Criterion C Eligibility fields below.

## Criterion C Eligibility

Provide a general description of the industrial activities that are taking place at this facility:

The facility is a 3.8 MGD secondary wastewater treatment plant receiving a total of about 10,000 gallons per day of wastewater from Northampton, Southampton and Holyoke. The WWTP is permitted to discharge treated wastewater to the Connecticut River via outfall pipe (Outfall #001) or to the Manhan River (Outfall #002) when hydraulic capacity of the primary outfall is exceeded. Stormwater onsite is collected from paved surfaces by a series of catch basins and discharged through two outfalls to the Manhan River.

Using your species list(s) attached above, determine which of the following applies:

The species list(s) includes only terrestrial species and/or their critical habitat. No aquatic or aquatic-dependent species or their critical habitat are present in the action area.

## Evaluation of Discharge-Related Activities Effects

Most of the potential effects related to coverage under the MSGP are assumed to occur to aquatic and/or aquatic-dependent species. However, in some cases, potential effects to terrestrial species and/or their critical habitat should be considered as well from any discharge-related activities that occur during coverage under the MSGP. Examples of discharge-related activities that could have potential effects on protected terrestrial species or their critical habitat include the storage of materials and land disturbances associated with stormwater management-related activities (e.g., the installation or placement of stormwater control measures).

Select the applicable statement below: There are no discharge-related activities that are planned to occur during my coverage under the 2021 MSGP.

You must verify your preliminary determination of effects on listed species and designated critical habitat from your discharges and/or discharge-related activities. Select one of the following that applies:

Based on the above responses, I have provided information supporting a preliminary determination that my discharges and/or discharge-related activities are not likely to adversely affect listed species and designated critical habitats.

Identify the USFWS and NMFS information resources and expertise (e.g., state or federal biologists) used to arrive at this conclusion. Any supporting documentation should explicitly state that both ESA-listed species and critical habitat under the jurisdiction of the USFWS and/or NMFS were considered in the evaluation.

To obtain FWS-listed species and critical habitat information, the resource consulted was the IPaC (Information, Planning, and Consultation System). To obtain NMFS-listed species and critical habitat information the resource consulted was the NOAA Fisheries Regions page and the NOAA Fisheries Greater Atlantic Region ESA Section 7 Mapper.

What ESA-listed species and/or critical habitat are located in your "action area"?

Northern long-eared bat (*Myotis septentrionalis*)

Distance in miles between your site and the ESA-listed species and/or critical habitat within the action area: 1

Provide a description of EPA approved measures you will implement or will continue to implement to ensure no likely adverse effects on ESA-listed species and/or critical habitat.

All industrial activities are contained within the wastewater treatment process. There is no exterior storage of raw materials or industrial waste.

**Note:** Any missing or incomplete information in this section may result in a delay of your coverage under the permit.

Historic Preservation: Criterion A

The following questions will help you determine your eligibility under Part 1.1.5 of the permit with respect to preservation of historic properties. You may still use the paper instructions in Appendix F ([https://www.epa.gov/sites/production/files/2021-01/documents/2021\\_msgp\\_-\\_appendix\\_f\\_-\\_procedures\\_relating\\_to\\_historic\\_properties\\_preservation.pdf](https://www.epa.gov/sites/production/files/2021-01/documents/2021_msgp_-_appendix_f_-_procedures_relating_to_historic_properties_preservation.pdf)) of the MSGP in advance or in conjunction with answering the questions in this section of the form. For more information about your State Historic Preservation Office (SHPO) or Tribal Historic Preservation Office (THPO), please visit the National Park Service (NPS) websites at:

- State Historic Preservation Office (SHPO) (<https://www.nps.gov/subjects/nationalregister/state-historic-preservation-offices.htm>)

Are you an existing facility that is resubmitting for certification under the 2021 MSGP? No

Are you constructing or installing any stormwater control measures? No

You are eligible under Criterion A.
